

Government Engineering College, Sheikhpura

B.Tech 2nd semester Mid Semester Examination 2026

Branch: EE and ECE

Full Marks: - 20

Paper: -Engineering Graphics & Designing (EGD)

Time :2 Hours

Instructions:

- i. The Marks are indicated in the right-hand margin.
- ii. There are two sections in this paper.
- iii. Attempt both sections.

Section: -A

- It contains 6 questions
- Each question containing 1 mark.
- Attempt any 5 questions
- Section A, total marks = $1 \times 5 = 5$

Q1. A series of paper has length to width ratio as
 $\sqrt{2}:1$ (b) $\sqrt{3}:1$ (c) $2:1$ (d) $3:1$

CO1, U [1 Marks]

(a)

Q2. When the plane makes the same angle with the axis as the generators, the curve is a
CO2, R [1 marks]

(a) Parabola (b) Ellipse (c) Hyperbola (d) circle

Q3. If the eccentricity is equal to one, then the curve is

CO2, R [1 marks]

(a) Parabola (b) circle (c) ellipse (d) Hyperbola

Q4. If the eccentricity is greater than one, then the curve is

CO2, R [1 marks]

(a) Parabola (b) circle (c) ellipse (d) Hyperbola

Q5. When the measurements are required in three consecutive units, the appropriate scale is

(a) Plain scale (b) Diagonal scale (c) Isometric scale (d) Scale of chords. CO1,R [1 marks]

Q6. Which of the following pencil leads is hardest.

(a) H (b) F (c) B (d) HB.

CO1,R [1 marks]

Section: -B

- It contains 4 questions
- Each question containing 5 marks.
- Attempt any 3 questions
- Section B, total marks = $3 \times 5 = 15$

Q1). Describe in brief Projection of points & Projection of line. CO1, U [5 Marks]

Q2) The front View and top view of a line measures 55 mm and 65 mm respectively, Their end projectors are 40 mm apart and one end of the line is 10mm above the HP, One end of the line is 10 mm above HP and in the VP. Draw the projections and find true length and true inclination of line. CO2, AN [5 Marks]

Q3) A line AB 70mm long is inclined at an angle of 30° to HP. It's end A is 10 mm above the HP and 15mm in front of VP. The front view of line is 50mm. Draw the projections of line AB. CO2, AN [5Marks]

Q4) Draw a vernier Scale of RF= $\frac{1}{25}$ to read centimetre and long enough to measure upto 4 metre. Also show the length of 2.39m and 0.91m CO3, AN [5Marks]
